the power factors for Optimus RAD + R/F are as follows:
standby 0.73
fluoroscopy 0.67

Examples:
Apparent power (average standby value):
0.85A x 400V x 1.73 = 588VA
Active power (average standby value):
0.85A x 400V x 1.73 x 0.73 = 429W

Max apparent power short term during exposures:
U x I x 1.73 =
(generator version dependent 50/65/80kW, see technical data PRB or service manual)
